Environmental Policy

At PTESL, we regard environmental issues to be especially important, and we shall aim to limit the environmental impact that our business has wherever feasibly possible. For regulatory and Corporate Social Responsibility reasons, we shall:

- Commit to environmental protection and prevention of pollution and shall fulfil our applicable legal/compliance obligations.
- Apply best practices and standards to meet PTESL's objectives and to assist clients in meeting their objectives and targets.
- Maintain awareness of the aspects of our operations that can impact the environment (e.g., use of electricity, sustainable purchasing choices, waste production, etc).
- Endeavour to influence others outside of our organisation, especially if there is an opportunity within services provided for substitution to less environmentally damaging options.

Considering our significant environmental aspects and the principles laid out by this environmental policy statement, we define and monitor environmental objectives and targets through the management processes, against which continual improvement can be demonstrated.
I have prepared this statement as my commitment to environmental management at PTESL. This message shall be communicated and understood throughout the company, and I expect all persons working on our behalf to share these values.
This policy statement shall be made available to the public upon request and subject to annual review to ensure its continued suitability.

This policy statement has been approved and authorised by the following:
